

***When a pregnant women practices „katsugen undo“, the baby becomes strong and delivery becomes painless and easy. But this is quite natural since a women’s body is so made as to give birth painlessly and easily, this is the natural way of giving birth. H.Noguchi***

The holistic education “Natural-Holistic-Guide” explains in detail the fundamental way of thinking about maintaining health based on Noguchi Seitai.

Come to understand the way your body is composed and how to order the body by the means of “Katsugen-Undo”, the unconscious movement. Each person unconsciously begins to relieve the tension in the body.

First time participants are surprised at the great changes, but as they realize they have within themselves, the inherent forces toward ordering the body, they **deepen their faith in their body**.

Exerpts from Mutsuko Nomuras book **"Seitai - widom of the women's body"**:

Many women are suffering from serious bodily conditions; they express the unnaturalness of childbirth, work, and lifestyle in modern society.

*"Before, I had a lifestyle where my work involving long hours of using a PC was very tiring. I always had migraine headaches and always had swelling from biases in my body. I disliked moving my body, felt heavy, and every day after coming home, all I could do was sleep. I participated in the **Seitai**-course, did ankle rotations and let my body follow the movements to order the body that arise from inside the body (**katsugen-undo**). I also diligently dealt with the changes of my body in each season. Then, I was able to welcome this pregnancy. I have absolutely no morning sickness, and I enjoy talking to the baby in my stomach and taking a walk every day with a feeling of abundance."*

There is a strong connection between the reproductive organs and cervical vertebraes. A disorder somewhere in the reproductive system has a great influence on a women's state of mind and behaviour. Without doubt, someone whose head is more or less empty is better suited to giving birth and bringing up children. There is a connection between the feet (ankles) and the mobility of the pelvis whether giving birth is hard or easy.

With **"Seitai"** I would like them to realize the importance of living fully with vitality, **enjoying child-rearing** with **bountiful maternal nature**, and regaining the woman's bodily rhythm which follows nature.

### **"Seitai" is a way**

- \* of passing through the menstrual period that does not damage the body
- \* of childbirth that follows the workings of nature; making women healthier and more beautiful and gentle in her being – towards the child & man;

***"I started to teach "katsugen-undo", which is a method of activating extrapyramidal movement.***

***These activities enable us to relax those points of tension in the body that cannot be relaxed in other ways."***
