What is the “LEITBILD” =Guiding Vision in your country?*1

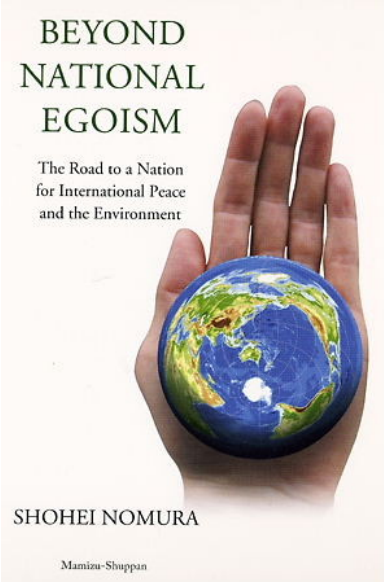

FEAR? – summed up in one word – guilt, enemy images, armament, war, competition, mistrust, ...

What kind of “LEITBILD” are you giving your children? ... And you?

What is your “LEITBILD”?

We need a New “LEITBILD” – for myself, for us, for us as a nation,
so that we may grow stronger through the **Power of Love**, of Light (Truth), and of our future. What we create now through our images and visions will become reality in the future. Let us explore together **which “LEITBILD” is meaningful** and which ones we should replace.

***1** *We have been led astray through **education via the media**, schools and universities – not by a devil – but by the “LEITBILD” that 1871, 1919 and since 1945, has gradually influenced our thinking, feeling and actions under the influence of the victorious Allies. It has also undermined the peaceful, creative spirit of the „A-Z“-people!*

Excerpts from **Kunio Shohei Nomura**:
BEYOND NATIONAL EGOISM

Let Us Create an Exciting Nation (S162)

https://beynatego.jimdofree.com/proposal-for-the-japanese-people/

The aim of this movement is to resolve the various problems of „A-Z“ and the world, and bring to reality **world peace**, but there is one more important aim. It is no other than to revive in the „A-Z“ people, **the joy in living, motivation in living, and pride**. ...feel truly happy about themselves having been born in such a wonderful „A-Z“...

making „A-Z“ a nation to **renounce egoism**. This movement aims to have this proposal penetrate into our daily lives and spread. The movement based on this proposal is not such that someone becomes a leader and the leader's orders are followed. In this movement, the correct path is for everyone who agrees to the concept of the proposal **to offer their wisdom and efforts, and nurture and develop the concept**.

This movement can become a common point for all people who are wishing for a better society. Further, I believe this will help each of us individuals **realize happiness.**

we must free „A-Z“ from national egoism, abandon the foolish dreams of a "mass consumption superpower" and military superpower, and in earnest, stand at the honorable lead toward the **realization of world peace**.

If you understand this concept well, you will see that regarding the nation and the fate of humankind, these are not separate from each of us individuals, and are not problems beyond our reach. Further, **discover with joy that the key**, which will be the first step toward the renewal of „A-Z“, **is in the hands of each of us individuals**. It is not something to be done by one person. It will be done by everyone. That is why it will be possible.

Wishing for **co-existence and co-prosperity of all humankind,** I hope that people who wish for our brilliant renewal will **open their hearts**— put on the shelf the conventional ways of thinking they have accumulated — and lend an ear to this proposal.

I desire ardently that **through the wisdom and knowledge of many people**, we can heighten the quality of this proposal, and you will participate in bringing to reality this ideal.

Now, What Should I Do?

As a Backbone Concept for Various Peace and Green Movements ...to become more effective, it is necessary for the various individuals and groups to become interconnected for one major ideal about which **everyone can feel satisfied**. The national ideal of a "Nation for International Peace and the Environment" is the kind of ideal that can become a **common aim**.

There is nothing to oppose. Under this ideal, if **one major network forms**, as the various movements support and link to each other, it will **create one large flow for transformation**.

Love of Peace in Each Person Is the Lead in This Movement

in this movement, there is no need for leaders or organizations. The **love of peace in each person is the lead**. Therefore, it is good enough for this idea to spread through different ways according to each person's situation.

"I agree with the proposal, but **what should I do concretely** toward realization of this proposal?"
...**first, start by telling your family and the people around you**.
Recommending this book or books that will be published from now on, and introducing the **webpage** of this proposal and movement are probably the easiest and most effective methods.
... **become enlightened by others…**
...initiating a group or a think-tank as **"Green Phoenix"** for this proposal, offering knowledge or information, offering funding, organizing and holding lectures and study groups, calling on various types of media, translation of books into other languages, interpreting at lectures and meetings, and creating websites and blogs.

Let Us Proceed Brightly and Joyfully

The last thing I would like to convey is that for this movement, I would like to proceed with the people **who "agree" with this proposal**. I would like us to envision a brilliant future for „A-Z" (EU), think about with a feeling of excitement, **"What can I do so that I can help in some way"**, **be creative, and work with a cheerful, joyful feeling and with hope**. I feel this attitude is the most important one when carrying forth with this movement. Without getting caught up in conventional past ways of thinking, let us be flexible in our way of thinking and exchange our ideas.

What is being proposed here is not a plea to "please cooperate with my way for raising an ideal for the country". Instead, it is **calling for "Everyone, let us pool all of our wisdom, raise an ideal for the country** of Germany, and eventually let us make „A-Z" (EU) a Nation for International Peace and the Environment"
